

How to install Lines on Ubuntu?

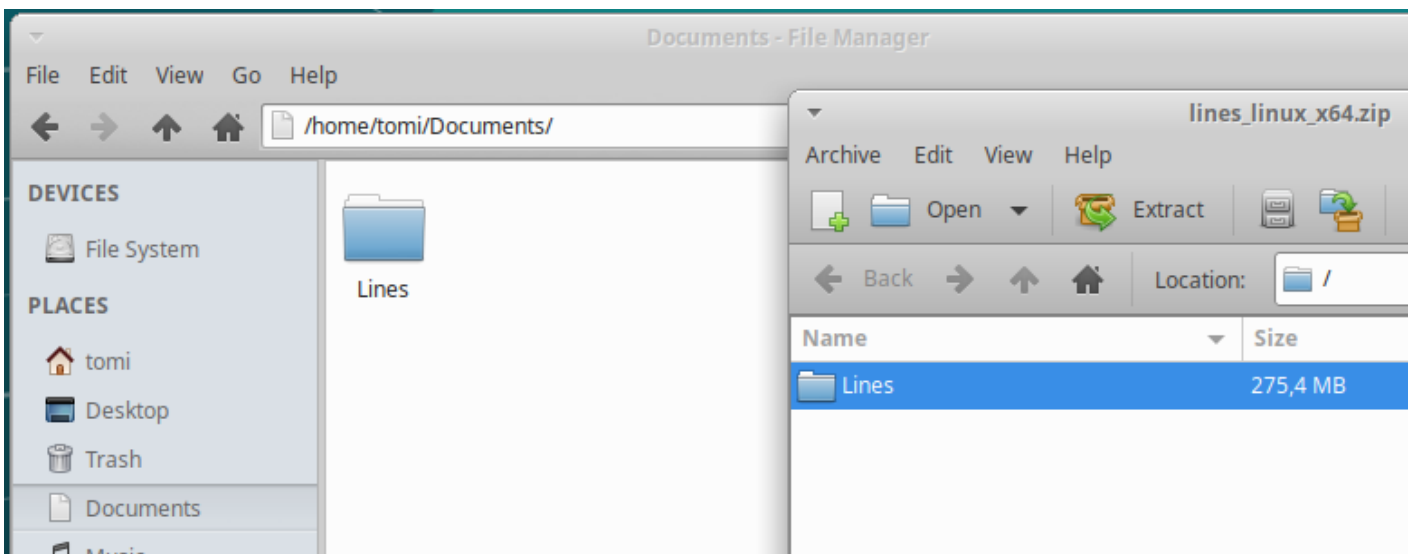

Simple step-by-step procedure on how to install Lines on Ubuntu (Xubuntu, Lubuntu, Debian...)

Required Lines version: >= 3.5

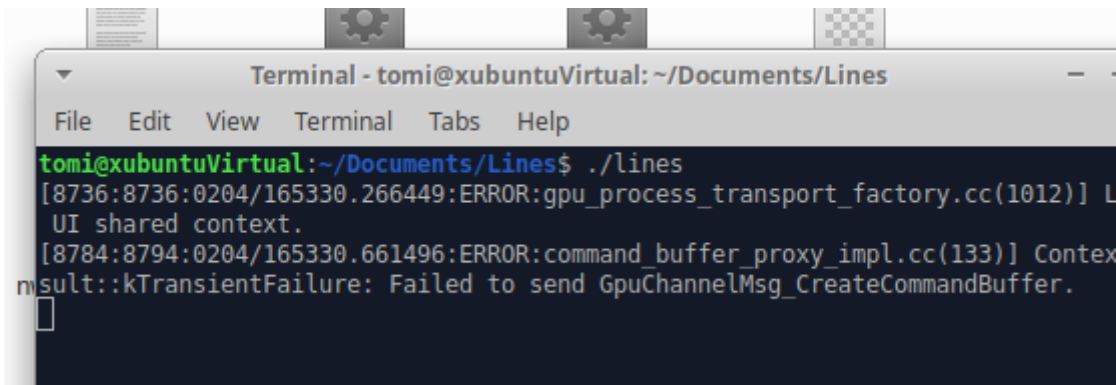

1. Download Lines package for Linux <https://www.creatixbih.com/lines/download>

2. Extract package to a folder of choice, in this example i extracted package to "Documents" folder in my home dir.

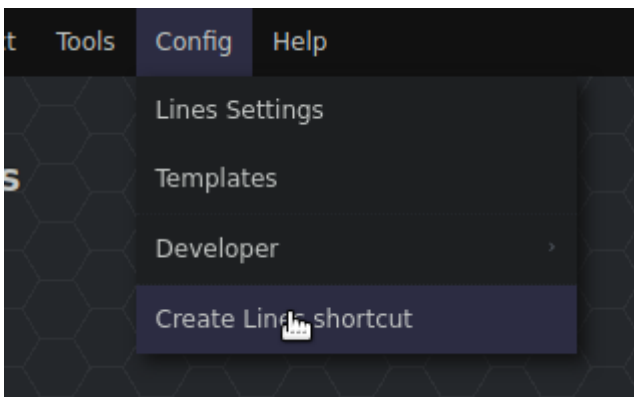

3. Start console in extracted folder (right click > Open terminal window) and type `./lines`, or just drag n drop file "lines" to console window and press enter. Application should start.

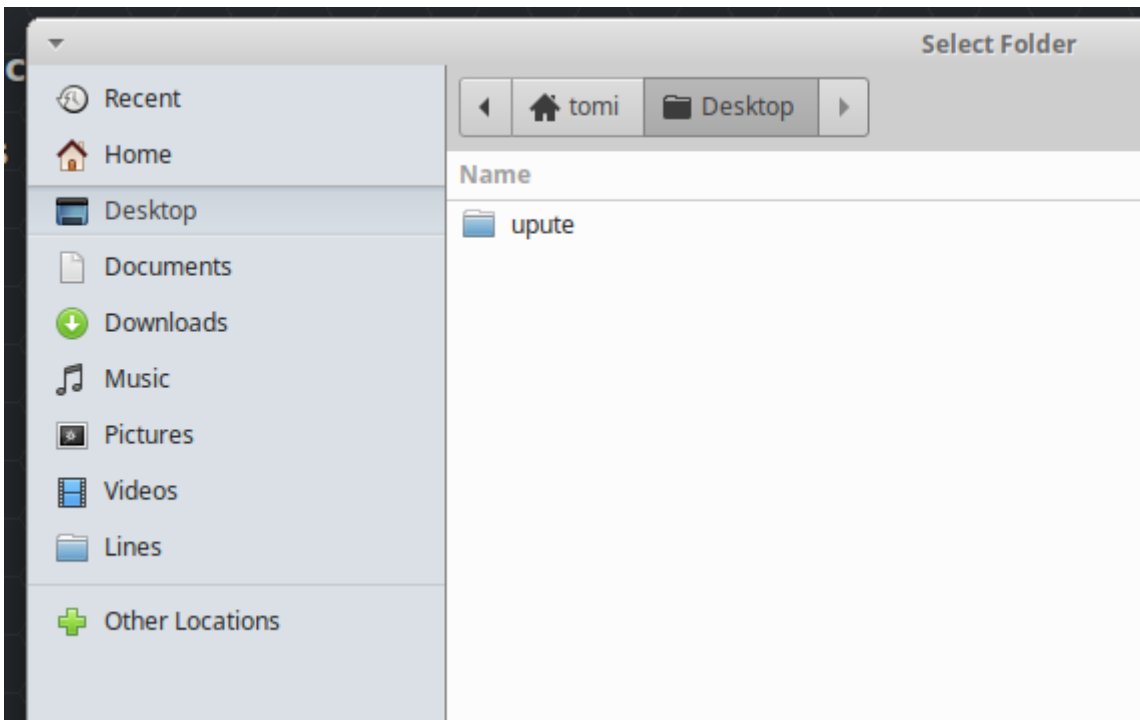

```
Terminal - tomi@xubuntuVirtual: ~/Documents/Lines
File Edit View Terminal Tabs Help
tomi@xubuntuVirtual:~/Documents/Lines$ ./lines
[8736:8736:0204/165330.266449:ERROR:gpu_process_transport_factory.cc(1012)] L
UI shared context.
[8784:8794:0204/165330.661496:ERROR:command_buffer_proxy_impl.cc(133)] Contex
m result::kTransientFailure: Failed to send GpuChannelMsg_CreateCommandBuffer.
```

4. Go to Menu > Tools > Create Lines shortcut

5. Folder browse dialog will appear asking you to select target folder for a new shortcut. Select desktop and confirm.

6. Desktop shortcut icon is created, run it by double-click. If system confirmation message shows asking you to make launcher executable, confirm.
